PROFILE

Data Analyst with 7+ years of experience building **Power BI dashboards**, **SQL-based reporting**, and **automation** that helps teams make faster decisions. I'm strongest in operational reporting, process improvement, and data quality, taking messy inputs and turning them into reliable **KPIs** leaders can use. Delivered measurable results including **30% less manual work** through automation, **25% faster** procurement reporting, and analytics that supported improved retention, pass rates, and job placement outcomes. I do well in roles where the goal is clear reporting, cleaner data, and better day-to-day decision-making across teams.

KEY HIGHLIGHTS

- Reduced manual processing and follow-ups by **automating** multi-step approval workflows, cutting turnaround from 3 to 4 business days to about 1 day.
- Reduced monthly procurement reporting time by 25% by centralizing spend tracking and enabling quick trend analysis for budget decisions.
- Built **KPI dashboards** used by leadership to track faculty research output and drive participation in publications and conferences.
- Built **predictive** and **performance models** that supported a 22% dropout reduction and a 60% pass-rate increase over a multi-year period.

SKILLS

- **BI and Dashboards:** Power BI, DAX, Tableau, KPI design, data storytelling, operational reporting
- **Data and Analysis:** SQL, Python, exploratory analysis, statistical analysis, forecasting, segmentation
- **Data Prep and Quality:** data cleaning, de-duplication, missing data handling, validation checks, documentation, governance practices
- **ETL and Automation:** ETL workflows, Power Automate, workflow routing, reporting pipelines, notifications
- **Excel:** PivotTables, structured tracking tables, reporting templates
- **Business Skills:** stakeholder reporting, requirements gathering, cross-functional collaboration, process improvement, clear documentation

PROFESSIONAL EXPERIENCE

Data & Reporting Analyst, Business Services (Official title: Business Services Assistant)
New York Institute of Technology, Vancouver, BC | Feb 2022 – Present

- Built **Power BI KPI dashboards** (incl. **DAX measures**) to track faculty research output (publications, conferences, books), using **manually collected** and cleaned data spanning 2000–2025, enabling leadership to monitor participation and identify gaps by department.
- Produced **leadership reporting** used by a small management group (about 4 to 5 users) to guide decisions on research promotion initiatives and participation targets.
- Automated student and internal request workflows in **Power Automate** across 2 to 4 approval steps, reducing end-to-end turnaround from 3 to 4 business days to about 1 day by eliminating manual email handoffs and improving status visibility.
- Improved procurement and payment processing by introducing a "blank purchase order" approach, enabling multiple small invoices to be paid against a single approved amount and reducing repeated approvals and admin effort.
- Built and maintained a centralized procurement tracking workbook shared with Operations, enabling quick budget trend reviews and month-over-month spend monitoring, and reducing monthly procurement reporting time by 25%.

- Supported **inventory management reporting** (furniture and operational items) using **SQL** and **Excel** to track quantities, flag low-stock risk, and support restocking decisions with basic notification triggers.
- Maintained **reporting accuracy** through a mix of **Excel** validation rules, manual QA, and peer review with an assistant to confirm completeness and reduce duplicates before publishing dashboards.
- Partnered with stakeholders to lead **requirements gathering** and translate reporting requirements into dashboards, reports, and workflow improvements.

Admin/IT Student Assistant
New York Institute of Technology, Vancouver, BC | Jan 2021 – Jan 2022

- Managed IT inventory tracking and improved database organization, contributing to 25% higher efficiency and 15% storage savings through a streamlined database design.
- Supported faculty, students and staff with IT and software troubleshooting, access requests, and day-to-day issue resolving 95% of issues within the first contact and improving overall satisfaction with IT services.
- Administered software access and kept inventory and license records accurate and up to date.

Data Analyst
Christ Knowledge City, Kerala, India | Jan 2016 – Feb 2020

- Built and maintained **Power BI** and **Tableau dashboards** for academic and operational performance, improving decision-making speed by 30% by consolidating department-level data into a single, reliable view and strengthening accuracy through SQL-based data validation.
- Led analysis of multi-year enrollment trends (3 to 4 years) during a period of declining intake (about 1000 down to 700–750), identifying drivers and supporting strategies to improve student attraction and outcomes.
- Developed **predictive analysis** in **Python** and **SQL** to understand enrollment and retention patterns, and to identify at-risk students early to support targeted interventions.
- Supported student retention initiatives that reduced dropout risk by 22% over roughly three years by helping teams identify students trending toward withdrawal based on attendance and academic indicators.
- Analyzed branch-level academic performance over three years, identifying patterns and root causes behind underperformance, supporting interventions that contributed to a 60% pass-rate increase over a multi-year period.
- Partnered with student services and academic departments to drive action from insights (extra training and targeted support for struggling cohorts), rather than producing reporting only.
- Identified skill gaps tied to employability, helping shape targeted improvement classes that contributed to a 30% increase in student job placements.
- Supported marketing and strategy teams with structured data requests and insight summaries to improve planning and campaign direction.
- Improved data reliability through ETL practices, data governance routines, and data quality checks (duplicates, missing fields, inconsistent values), and documented work using Jupyter Notebooks.

EDUCATION

- Master of Instructional Technology | New York Institute of Technology, Vancouver, BC | Dec 2021
- M.Tech, VLSI and Embedded Systems | Mahatma Gandhi University, Kerala, India | May 2015
- B.Tech, Electronics Engineering | Mahatma Gandhi University, Kerala, India | May 2011
